Subject: PrecISE Trade migration to .NET 2.0

The ISE is planning to migrate all PrecISE Trade components to Microsoft's .NET 2.0 framework. Our goal is to have the conversion complete for the 2.1 release of PrecISE trade. This release is scheduled for **Monday, August 27th**.

The ISE is giving its membership notice of this important change to provide our Precise customers ample time to prepare for the scheduled conversion. For download instructions and additional information regarding the Microsoft .NET Framework Version 2.0 redistributable package (x86), please refer to Microsoft's Download Center website. We ask that our customers e-mail their questions or concerns to helpdesk@iseoptions.com.
