Information on the Notes

Merrill Lynch & Co., Inc. (the "Issuer") has issued Capped Leverage Index Return Notes ("Notes") linked to the S&P 500 Index (the "Index"). The Notes were priced at \$10 each and mature on April 30, 2010.

The Notes are senior, unsecured debt securities that provide a leveraged return for investors, subject to a cap, if the level of the Index increases moderately from the Starting Value of the Index, determined on October 30, 2008, the date the Notes were priced for initial sale to the public, to the Ending Value of the Index determined on the Calculation Days shortly prior to the Maturity Date of the Notes. Investors must be willing to forego interest payments on the Notes and be willing to accept a return that is capped or a repayment that may be less, and potentially significantly less, than the Original Public Offering Price of the Notes.

If held to maturity, investors will receive the following:

- If the Ending Value of the Index is greater than the Starting Value:
$$\$10 + [\$10 \times ((\text{Ending Value} - \text{Starting Value}) / \text{Starting Value}) \times 200\%]$$
- If the Ending Value is greater than or equal to the Threshold Value:
$$\$10$$
- If the Ending Value is less than the Threshold Value:
$$\$10 + [\$10 \times ((\text{Ending Value} - \text{Starting Value}) / \text{Starting Value}) \times 100\%]$$

Payments at maturity cannot exceed the Capped Value of \$14.20 per Note.

The Starting Value of the Index is 954.09. The Threshold Value is 858.68. The Ending Value of the Index will be determined closer to the maturity date.

Please see the prospectus for the Notes for more details regarding the calculations and the mechanics of the Notes.

It is expected that the market value of the Notes will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.
