

Nasdaq NOIView Version 3.0

1. Overview

Nasdaq NOIView 3.0 is a direct data feed product offered by The Nasdaq Stock Market[®], which features the following data elements:

- o Net Order Imbalance Data: In the minutes leading up to the Nasdaq Opening and Closing Crosses as well as IPO/Halt/Imbalance Cross, Nasdaq disseminates the indicative clearing price and net order imbalance in the Nasdaq execution system. Because the calculation includes non-displayable as well as displayable order types, the net order imbalance indicator (NOII) is the best predictor of the Nasdaq opening and closing prices available to the public.
- o Administrative messages, such trading actions and symbol directory for Nasdaq-listed issues:
 - o Stock trading action messages are used to inform market participants when a security is halted / paused, released for quotation and released for trading.
 - o Stock symbol Directory messages provide basic security data such as the market tier and Financial Status Indicator.

Please note that NOIView is a filtered Nasdaq data feed product. The NOII and administrative messages are also supported on the Nasdaq TotalView-Aggregated data feed.

2. Architecture

The NOIView 3.0 feed is made up of a series of sequenced messages. Each message is variable in length based on the message type. The messages that make up the NOIView 3.0 protocol are typically delivered using a higher level protocol that takes care of sequencing and delivery guarantees.

Nasdaq offers the NOIView 3.0 data feed in three protocol options:

- o [SoupBinTCP](#)
- o [Compressed](#) via SoupBinTCP
- o [MoldUDP64](#)

Please note that, for each data center connection, NOIView 3.0 messages will be disseminated via a single outbound data channel.

3. Data Types

All integer fields are unsigned big-endian (network byte order) binary encoded numbers.

Prices are integer fields, supplied with an associated precision. When converted to a decimal format, prices are in a fixed point format, where the precision defines the number of decimal places. For example, a field flagged as Price (4) has an implied 4 decimal digits.

Timestamps reflects the Nasdaq system time at which the outbound message was generated. Nasdaq states time as the number of nanoseconds past midnight. The time zone is U.S. Eastern Time.

All alphanumeric fields are left-justified. Padding spaces appear on the right as necessary.

4. Message Formats

Nasdaq NOIView 3.0 supports three basic types of messages:

- o System Events
- o Nasdaq Net Order Imbalance Indicators
- o Administrative Data

Within the system event and administrative types, Nasdaq may support multiple message formats as outlined below.

4.1 System Event Message

The system event message type is used to signal a market or data feed handler event. The format is as follows:

SYSTEM EVENT MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"S"	System Event Message
Tracking Number	1	2	Integer	Nasdaq internal tracking number
Timestamp	3	6	Timestamp	Time at which the system event was generated.
Event Code	9	1	Alpha	Refer to System Event Codes below

SYSTEM EVENT CODES	
Code	Explanation
"O"	<i>Start of Messages.</i> This is always the first message sent in any trading day.
"S"	<i>Start of System Hours.</i> This message indicates that Nasdaq is open and ready to start accepting orders.
"Q"	<i>Start of Market Hours.</i> This message is intended to indicate that Market Hours orders are available for execution.
"X"	<i>Clear NOII - Opening Cross Data.</i> This message signals that firms may clear NOII cache for the regular Opening Cross.
"M"	<i>End of Market Hours.</i> This message is intended to indicate that Market Hours orders are no longer available for execution.
"E"	<i>End of System Hours.</i> It indicates that Nasdaq is now closed and will not accept any new orders.
"C"	<i>End of Messages.</i> This is always the last message sent in any trading day. For initial implementation of the integrated Nasdaq system, this message will be disseminated between 8:00 and 9:00 p.m., ET.

4.2 Administrative Message

4.2.1 Stock Directory

At the start of each trading day, Nasdaq disseminates stock directory messages for all active symbols in the Nasdaq execution system.

Market data redistributors should process this message to populate the Financial Status Indicator (required display field) and the Market Category (recommended display field) for Nasdaq-listed issues.

4.2.2 Stock Trading Action

Nasdaq uses this administrative message to indicate the current trading status of a security to the trading community.

Prior to the start of system hours, Nasdaq will send out a Trading Action spin. In the spin, Nasdaq will send out a Stock Trading Action message with the "T" (Trading Resumption) for all Nasdaq- and other exchange-listed securities that are eligible for trading at the start of the system hours. If a security is absent from the pre-opening Trading Action spin, firms should assume that the security is being treated as halted in the Nasdaq platform at the start of the system hours. Please note that securities may be halted in the Nasdaq system for regulatory or operational reasons.

After the start of system hours, Nasdaq will use the Trading Action message to relay changes in trading status for an individual security. Messages will be sent when a stock is:

- Halted

- Paused*
- Released for quotation

- Released for trading

* The paused status will be disseminated for Nasdaq-listed securities only. Trading pauses on non- Nasdaq listed securities will be treated simply as a halt.

STOCK TRADING ACTION

Reason	18	4	Alphanumeric	Reflects the Market Ops or MarketWatch code for the trading state change. Refer to Appendix C for values.

4.2.3 Reg SHO Short Sale Price Test Restricted Indicator

In February 2011, the Securities and Exchange Commission (SEC) will implement changes to Rule 201 of the Regulation SHO (Reg SHO). For details, please refer to [SEC Release Number 34-61595](#). In association with the Reg SHO rule change, Nasdaq will introduce the following Reg SHO Short Sale Price Test Restricted Indicator message format.

For Nasdaq-listed issues, Nasdaq will support a full pre-opening spin of Reg SHO Short Sale Price Test Restricted Indicator messages indicating the Rule 201 status for all active issues. Nasdaq will also send the Reg SHO Short Sale Price Test Restricted Indicator message in the event of an intraday status change.

Nasdaq will process orders based on the most Reg SHO Restriction status value.

4.3 Net Order Imbalance Indicator (NOII)

Nasdaq disseminates NOII data at 5-second intervals in the minutes leading up to the [Nasdaq Opening and Closing Crosses](#) as well as the [IPO/Halt Crosses](#):

- o For the standard Nasdaq Opening Cross, NOII messages will be disseminated during the two minutes leading up to the start of market hours.
- o For the Nasdaq cross for IPO and halted / paused securities, NOII messages will be disseminated during the quote only period. The first NOII message will be disseminated approximately five seconds after the Stock Trading Action message with the "Q" or "R" action value is disseminated.
- o For the Nasdaq Closing Cross, NOII messages will be disseminated during the ten minutes leading up to the end of market hours.

NOII MESSAGE

4.4 Cross Trade Message

Cross Trade message indicates that Nasdaq has completed its cross process for a specific security. Nasdaq sends out a Cross Trade message for all active issues in the system following the Opening, Closing and EMC cross events. Firms may use the Cross Trade message to determine when the cross for each security has been completed. (Note: For the halted / paused securities, firms should use the Trading Action message to determine when an issue has been released for trading.)

For most issues, the Cross Trade message will indicate the bulk volume associated with the cross event. If the order interest is insufficient to conduct a cross in a particular issue, however, the Cross Trade message may show the shares as zero.

CROSS TRADE MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"Q"	Cross Trade Message
Tracking Number	1	2	Integer	Nasdaq internal tracking number
Timestamp	3	6	Timestamp	Time at which the stock trading action message was generated
Shares	9	8	Integer	The number of shares matched in the Nasdaq Cross.
Stock	17	8	Alphanumeric	The security symbol associated with the cross trade message.
Cross Price	25	4	Price (4)	The price at which the cross occurred. Refer to Data Types for field processing notes.
Match Number	29	8	Integer	The Nasdaq generated day-unique Match Number of this execution.
Cross Type	37	1	Alphanumeric	The Nasdaq cross session for which the

				message is being generated. "O" = Nasdaq Opening Cross. "C" = Nasdaq Closing Cross. "H" = Cross for IPO and halted / paused securities.

Appendix A

Trading Action – Reason Codes

For Nasdaq-listed issues, Nasdaq acts as the primary market and has the authority to institute a trading halt or trading pause in an issue due to news dissemination or regulatory reasons.

For CQS issues, Nasdaq abides by any regulatory trading halts and trading pauses instituted by the primary or listing market as appropriate.

For both issue types, Nasdaq may also halt trading for operational reasons.

Nasdaq will send out a trading action message to inform its market participants when the trading status of an issue changes. For informational purposes, Nasdaq also attempts to provide the reason for each trading action update. For bandwidth efficiency reasons, Nasdaq uses a 4-byte code for the reason on its outbound data feeds.
