

## Nasdaq BX Best Bid and Offer (BX BBO)

Version 2.1

# 1 Overview

## 1.1 Product Description

BX Best Bid and Offer (BX BBO) is a direct data feed product offered by Nasdaq to support the BX Trading Market. BX BBO provides the exchange's best bid and offer position for securities listed on the Nasdaq, New York Stock Exchange (NYSE), and other U.S. regional exchanges.

Market data distributors may use the BX BBO data feed to feed dynamically updating stock tickers, portfolio trackers, trade alert programs, time and quote graphs, and other display systems. For market data administration purposes, BX BBO is part of the BX Basic entitlement.

For pricing and ordering information:

For pricing and ordering information, please contact [Nasdaq Investment Intelligence](#) at +1 301 978 5307 or +45 33 93 33 66.

## 2 Network Protocol Options

For direct data feed subscribers, Nasdaq will offer the BX BBO data feed in the following protocol options:

- SoupBinTCP
- MoldUDP64

In order to match the BX Basic entitlement structure, BX BBO will initially support three outbound channels for both protocol options. The BX BBO data set will be channelized based on the listing market of a security.

Data Channel	Securities coverage
1	Nasdaq listed issues
2	NYSE Listed Issues
3	Other Regional Issues

## 3 Architecture

BX BBO will be made up of a series of sequenced messages. Each message is variable in length based on the message type. The messages that make up the BX BBO protocol are typically delivered using a higher level protocol that takes care of sequencing and delivery guarantees.

## 4 Data Types

All integer fields are unsigned big-endian (network byte order) binary encoded numbers.

All alphanumeric fields are ASCII fields which are left justified and padded on the right with spaces.

Prices are integer fields, supplied with an associated precision. When converted to a decimal format, prices are in a fixed point format, where the precision defines the number of decimal places. For example, a field flagged as Price (4) has an implied 4 decimal digits.

Timestamps reflects the Nasdaq system time at which the outbound message was generated. Nasdaq states time as the number of nanoseconds past midnight. The time zone is U.S. Eastern Time.

## 5 Message Formats

**Note:** For consistency, Nasdaq has coded the BX Best Bid and Offer to use the same data formats as the Nasdaq Best Bid and Offer (QBBO) and PSX Best Bid and Offer (PSX BBO) data feed offerings. Functionality that is not currently supported for the BX market has been *grayed out*.

### 5.1 System Event Message

The System Event message is used to signal key market or data feed control events. BX BBO will support the System Event messages.

SYSTEM EVENT MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"S"	System Event
Tracking Number	1	2	Integer	Nasdaq internal tracking number
Time Stamp	3	6	Timestamp	Time stamp
Event Code	9	1	Alphanumeric	Denotes the type of event for which the message is being generated. See list below for allowable values.

On a daily basis, BX BBO will support the following event codes:

SYSTEM EVENT CODES – DAILY	
Code	Explanation
0	<i>Start of Transmissions:</i> Denotes that BX BBO has started its daily transmission schedule

S	<i>Start of System Hours:</i> This message indicates that BX is open and ready to start accepting orders.
Q	<i>Start of Market Hours:</i> This message is intended to indicate that Market Hours orders are available for execution.
M	<i>End of Market Hours:</i> This message is intended to indicate that Market Hours orders are no longer available for execution.
E	<i>End of System Hours:</i> It indicates that BX is now closed and will not accept any new orders today.
C	<i>End of Transmissions:</i> Denotes that BX BBO has completed its daily transmission schedule.

## 5.2 Administrative Messages

### 5.2.1 Stock Directory

At the start of each trading day, Nasdaq BX disseminates stock directory messages for all active symbols in its market center system.

Market data vendors should process this message to populate the Financial Status Indicator (required display field) and the Market Category (recommended display field) for Nasdaq-listed issues.

### 5.2.2 Stock Trading Action

Nasdaq uses this administrative message to indicate the current trading status of a security to the trading community.

Prior to the start of system hours, Nasdaq will send out a Trading Action spin. In the spin, Nasdaq will send out a Stock Trading Action message with the “T” (Trading Resumption) for all Nasdaq- and other exchange-listed securities that are eligible for trading at the start of the BX system hours. If a security is absent from the pre-

opening Trading Action spin, firms should assume that the security is being treated as halted in the BX platform at the start of the system hours. Please note that securities may be halted in the BX system for regulatory or operational reasons.

After the start of system hours, Nasdaq will use the Trading Action message to relay changes in trading status for an individual security. Messages will be sent when a stock is:

- Halted
- Released for quotation
- Released for trading

### 5.2.3 Reg SHO Short Sale Price Test Restricted Indicator

In November 2010, the Securities and Exchange Commission (SEC) implemented changes to Rule 201 of the Regulation SHO (Reg SHO). For details, please refer to [SEC Release Number 34-61595](#). In association with the Reg SHO rule change, Nasdaq

introduced the following Reg SHO Short Sale Price Test Restricted Indicator message format.

For Nasdaq-listed issues, Nasdaq supports a full pre-opening spin of Reg SHO Short Sale Price Test Restricted Indicator messages indicating the Rule 201 status for all active issues. Nasdaq also sends the Reg SHO Short Sale Price Test Restricted Indicator message in the event of an intraday status change.

For other exchange-listed issues, Nasdaq relays the Reg SHO Short Sale Price Test Restricted Indicator message when it receives an update from the primary listing exchange.

Nasdaq processes orders based on the most Reg SHO Restriction status value.

REG SHO RESTRICTION				
Name	Offset	Length	Value	Notes
Message Type	0	1	"Y"	Reg SHO Short Sale Price Test Restricted Indicator
Tracking Number	1	2	Integer	Nasdaq internal tracking number
Timestamp	3	6	Timestamp	Time at which the market participant position message was generated

Breached Level	9	1	Alphanumeric	Denotes the MWCBC Level that was breached.  "1" = Level 1 "2" = Level 2 "3" = Level 3

## 5.2.5 Operational Halt

The Exchange uses this message to indicate the current Operational Status of a security to the trading community. An Operational Halt means that there has been an interruption of service on the identified security impacting only the designated Market Center. These Halts differ from the "Stock Trading Action" message types since an Operational Halt is specific to the exchange for which it is declared, and does not interrupt the ability of the trading community to trade the identified instrument on any other market place.

Nasdaq uses this administrative message to indicate the current trading status of the three market centers operated by Nasdaq.

Operational Halt				
Name	Offset	Length	Value	Notes
Message Type	0	1	"h"	Operational Halt
Tracking Number	1	2	Integer	Nasdaq internal tracking number
Timestamp	3	6	Integer	Time at which the Operational Halt message was generated. Refer to Data Types for field processing notes.

## Stock Symbol Convention

For Nasdaq-listed issues, Nasdaq currently restricts its symbol length to a maximum of 8 characters. For common stock issuances, Nasdaq, BX and BX will only assign root symbols of 1 to 4 characters in length with possible fifth and or sixth character denoting a suffix. In certain instances, a dot “.” delimiter may be applied to symbols after the root and between the suffix eg., XXXX.A. For subordinate securities, Nasdaq and BX will assign a 5 character symbol for which the last character relays information about the issue class or issue type. For the current list of fifth and or six character symbol suffixes, please refer to [Ticker Symbol Convention](#) page on the Nasdaq Trader website.

For NYSE-, NYSE American- and NYSE Arca-listed securities with subordinate issue types, please refer to [Ticker Symbol Convention](#) page on the Nasdaq Trader website.

## Appendix B

### Trading Action Reason Codes

For Nasdaq-listed issues, Nasdaq acts as the primary market and has the authority to institute a trading halt or trading pause in an issue due to news dissemination or regulatory reasons.

For CQS issues, Nasdaq, BX and PSX abide by any regulatory trading halts and trading pauses instituted by the primary or listing market as appropriate.

For all issue types, Nasdaq, BX and/or PSX may also halt trading for operational reasons. Nasdaq, BX and/or PSX will send out a trading action message to inform its market participants when the trading status of an issue changes. For informational purposes, Nasdaq and BX also attempt to provide the reason for each trading action update. For bandwidth efficiency reasons, Nasdaq, BX and PSX use a 4-byte code for the reason on its outbound data feeds.

## Documentation Version Control Log

### July 21, 2022: BX BBO Version 2.1

Due to the launch of non-integer leverage factors, updated the Value/Description field of ETP Leverage Factor from section 5.2.1 page 6.

### May 3, 2018: BX BBO Version 2.1

Nasdaq made the decision to fall back to the previous version number to avoid customer confusion related to different sequencing between the version number of the product specifications and the version number of the actual product code.

### March 3, 2018: BX BBO Version 2.2

Released a new version of Nasdaq BX Best Bid and Offer documentation to add a new Operational Halt message (Section 5.2.5) to indicate the current Operational Status of a security to the trading community.

### September 12, 2017: BX BBO Version 2.1

Nasdaq added a new Market Category code in the Stock Directory message for the Investors' Exchange, LLC to distinguish IEX-listed issues. New market category code is "V". Nasdaq also added a new Security Class field ("V") for Investors' Exchange, LLC in the Quotation messages and Stock Trading Action messages.

### March 6, 2015: BX BBO Version 2.1

Please keep in mind that there are currently no plans to facilitate trading of Exchange Traded Managed Funds on BX. We are adding these items in gray (to denote inactive functionality) if NextShares begin trading on BX, we will activate this functionality.

The BX BBO Specification was updated include:

- Addition of NextShares Quotation Message
- New Issue Sub-Type Code "EM" for Exchange Traded Managed Funds
- Clarification Data Types section

Nasdaq and NFS are requesting that market data vendors display NextShares orders, quotations and trades in NAV-based format if at all possible. For display purposes, Nasdaq is including the NAV premium / discount amount data points on QBBO, NLS and NLS Plus for this purposes. Firms may also calculate the NAV premium / discount amount from proxy price field by deducting \$100 from the disseminated value.

If firms decide to display NextShares data in proxy price format, Nasdaq and NFS are asking firms to add an indicator to the display so consumers to understand that this value is not the actual execution price for the trade/quote.

### December 5, 2014: BX BBO Version 2.00

The BX BBO Specification was updated to include missing Issue Sub-Type Codes (Appendix D):

- AI – Alpha Indexes ETNs
- CO – Collateralized Mortgage Obligation
