Production Connectivity

Nasdaq provides subscribers the potential for significant reductions in latencies in a robust and resilient network environment with two connectivity services – Nasdaq Proprietary Handoffs and Nasdaq Third Party Connections.

Offering

Nasdaq Proprietary Hand-offs provide access to Nasdaq markets and are delivered over the existing Nasdaq connections, including Direct Connects and Co-Location.

The Nasdaq markets include:

- Equities: The Nasdaq Stock Market, Nasdaq BX, Nasdaq PSX
- Options: Nasdaq PHLX (PHLX), Nasdaq Options Market (NOM), Nasdaq BX Options (BX), Nasdaq ISE (ISE), Nasdaq GEMX (GEMX), Nasdaq MRX (MRX)

Nasdaq Third Party Connections provide access to the following third party services and/or market data feeds: FINRA / SIAC/NYSE/ICE.

Please view this [link](#) for a complete list of third party services available via Nasdaq.

Nasdaq Proprietary Handoffs	NRC	MRC

Easy to Order

Both Nasdaq Handoffs and Third Party Connection orders can be placed via the Nasdaq Customer Portal. Users can self-register by visiting the website and clicking “Create Account”. Upon Firm Administrator’s approval, users will gain access to the portal. Billing begins once the installation is completed by the data center team. Clients may also connect Third Party Services through an approved extranet.

Ordering Market Data & Ports

To request approval for access to any of the Nasdaq proprietary data feeds or UTP/FINRA feeds, please complete the online [Data Feed Request Form](#) or the [Hard Copy Form](#). For more information, contact Nasdaq Global Data Products at +1 301 978 5307.

For all other feeds please contact your sales representative. To request ports for order entry, quote or trade reporting, please complete the applicable [Port Request Form](#) in the Customer Portal.
