Information on the Notes

Bank of America (the "Issuer") has issued Market Index Target-Term Securities ("MITTS") linked to the S&P 500 Index (the "Index"). The Notes were priced at \$10 each and mature on March 28, 2014.

The MITTS are senior unsecured debt securities and are not guaranteed or insured by the Federal Deposit Insurance Corporation or secured by collateral. The MITTS will rank equally with all other unsecured and unsubordinated debt, and any payments due on the MITTS, including any repayment of principal, will be subject to the credit risk of the Issuer. The MITTS provide investors with a 100% participation rate in increases in the level of the Index from the Starting Value of the Index, determined on the pricing date, to the Ending Value of the Index, determined during the Maturity Valuation Period shortly before the maturity date, subject to a maximum return of 57% over the Original Offering Price. Investors must be willing to forgo interest payments on the MITTS and be willing to accept a return that is capped.

At maturity, investors will receive:

- If the Ending Value of the Index is greater than the Starting Value of the Index:

$$\$10 + [\$10 \times ((\text{Ending Value} - \text{Starting Value}) / \text{Starting Value})]$$

Payment will not exceed the Capped Value of \$15.70.

- If the Ending Value of the Index is less than the Starting Value of the Index:

\$10

The Starting Value of the Index is 813.88. The Ending Value of the Index will be determined closer to the maturity date.

Please see the prospectus for the Notes for more details regarding the calculations and details regarding the Index.

It is expected that the market value of the Notes will depend substantially on the value of the Index and may be affected by a number of other interrelated factors including, among other things: the general level of interest rates, the volatility of the Index, the time remaining to maturity, the dividend yield of the stocks comprising the Index, and the credit ratings of the Issuer.
