BACKGROUND INFORMATION ON THE FUNDS

The iShares Trust (the “Trust”) is a management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”), consisting of several investment portfolios. This circular relates only to the Funds listed above (each, a “Fund” and together, the “Funds”). The shares of the Fund are referred to herein as “Shares.” BlackRock Fund Advisors (“BFA” or the “Adviser”) is the investment adviser to the Funds.

iShares Adaptive Currency Hedged MSCI EAFE ETF

The iShares Adaptive Currency Hedged MSCI EAFE ETF (DEFA) seeks to track the investment results of an index composed of large- and mid-capitalization equities in Europe, Australasia, and the Far East while dynamically hedging currency risk for a U.S. dollar based investor.

The Fund seeks to track the investment results of the MSCI EAFE Adaptive Hedge to USD Index (the “Underlying Index”), which has been developed by MSCI Inc. (the “Index Provider” or “MSCI”) as an equity benchmark for international stock performance with the foreign currency exposure of the securities included in the Underlying Index dynamically hedged against the U.S. dollar determined systematically by four currency risk indicators: carry, momentum, value, and volatility. As of December 11, 2015, the Underlying Index consisted of securities from the following countries or regions: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the United Kingdom. The Underlying Index may include large-, mid- or small-capitalization companies. Components primarily include consumer discretionary, financials and industrials companies. The components of the Underlying Index, and the degree to which these components represent certain industries, are likely to change over time.

As of its inception date, the Fund intends to seek to achieve its investment objective by investing a substantial portion of its assets in the Underlying Fund.

BFA uses a “passive” or indexing approach to try to achieve the Fund’s investment objective. Unlike many investment companies, the Fund does not try to “beat” the index it tracks and does not seek temporary defensive positions when markets decline or appear overvalued.

Indexing may eliminate the chance that the Fund will substantially outperform the Underlying Index but also may reduce some of the risks of active management, such as poor security selection.

Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies.

BFA uses a representative sampling indexing strategy to manage the Fund and the Underlying Fund. “Representative sampling” is an indexing strategy that involves investing in a representative sample of securities or other instruments comprising the Underlying Index. The securities selected are expected to have, in the aggregate, investment characteristics (based on factors such as market capitalization and industry weightings), fundamental characteristics (such as return variability and yield) and liquidity measures similar to those of the Underlying Index. The Fund and the Underlying Fund may or may not hold all of the securities and other components of its Underlying Index. The Fund generally will invest at least 90% of its assets in the component securities (including indirect investments through the Underlying Fund) and other instruments of the Underlying Index and in investments that have economic characteristics that are substantially identical to the component securities of the Underlying Index (i.e., depositary receipts representing securities of the Underlying Index) and may invest up to 10% of its assets in certain futures, options and swap contracts, cash and cash equivalents, including shares of money market funds advised by BFA or its affiliates, as well as in securities not included in the Underlying Index, but which BFA believes will help the Fund track the Underlying Index. Components of the Underlying Index include equity securities and foreign currency forward contracts (both deliverable and non-deliverable) designed to hedge against non-U.S. currency fluctuations. The Fund seeks to track the investment results of the Underlying Index before the fees and expenses of the Fund.

In order to replicate the “hedging” component of the Underlying Index, which attempts to mitigate currency risk, the Fund intends to enter into foreign currency forward contracts designed to offset the Fund’s holdings in component securities denominated in a non-U.S. dollar currency. A foreign currency forward contract is a contract between two parties to buy or sell a specified amount of a specific currency in the future at an agreed upon exchange rate. The Fund’s exposure to foreign currency forward contracts is based on the exposure of the Fund to the component securities and a hedge ratio (“Hedge Ratio”), as calculated by MSCI.

The Underlying Index applies a methodology, based on the Hedge Ratio, that sells the total value or a portion of the total value of each non-U.S. dollar currency in which the securities of the Underlying Index are denominated in the form of a one-month currency contract to create a “hedge” against fluctuations in the relative value of the currencies in relation to the U.S. dollar. The Hedge Ratio is based on four commonly used indicators for measuring currency risk, which are equally weighted and include: value (relative purchasing power between the foreign currency and the U.S. dollar based on exchange rates over a long-term average), momentum (relative price momentum of the foreign currency compared against the U.S. dollar over the previous six months), carry (differences in short-term interest rates between the foreign currency and the U.S. dollar over a long-term average), and volatility (relative price volatility of the foreign currency based on the currency’s one-month average

against its six-month average). The overall effect, since the four indicators are equally weighted, is that each foreign currency represented by constituent weights in the Underlying Index can be unhedged, 25% hedged, 50% hedged, 75% hedged or fully hedged relative to the U.S. dollar. The hedge (based on the Hedge Ratio) is reset on a monthly basis by MSCI and will not be adjusted intra-month based on movement in the value of the underlying equity securities and/or currencies, or based on the four indicators. The Underlying Index may therefore be slightly “over-hedged” (if equity values decline) or “under-hedged” (if the equity values increase) between the month-end rebalances. The Underlying Index is therefore intended to have higher returns than an equivalent unhedged investment when the component currencies are weakening relative to the U.S. dollar. Conversely, the Underlying Index is therefore intended to have lower returns than an equivalent unhedged investment when the component currencies are strengthening relative to the U.S. dollar. While the use of foreign currency forward contracts, based on the Hedge Ratio, is designed to minimize the impact of the strengthening or weakening of a foreign currency on Fund returns, it does not necessarily eliminate the Fund’s exposure to the component currencies. The return of the foreign currency forward contracts may not perfectly offset the actual fluctuations between the component currencies and the U.S. dollar.

The Fund may use non-deliverable forward (“NDF”) contracts to execute its hedging transactions. An NDF is a contract where there is no physical settlement of two currencies at maturity. Rather, based on the strengthening or weakening of the currencies, a net cash settlement will be made by one party to the other.

The Fund may lend securities representing up to one-third of the value of the Fund's total assets (including the value of any collateral received).

The Underlying Index is calculated by the Index Provider, which is independent of the Fund and BFA. The Index Provider determines the composition and relative weightings of the securities and currency forwards in the Underlying Index and publishes information regarding the market value of the Underlying Index.

The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that the Underlying Index is concentrated. For purposes of this limitation, securities of the U.S. government (including its agencies and instrumentalities) and repurchase agreements collateralized by U.S. government securities are not considered to be issued by members of any industry.

iShares Adaptive Currency Hedged MSCI Japan ETF

The iShares Adaptive Currency Hedged MSCI Japan ETF (DEWJ) seeks to track the investment results of an index composed of large- and mid-capitalization Japanese equities while dynamically hedging currency risk for a U.S. dollar based investor.

The Fund seeks to track the investment results of the MSCI Japan Adaptive Hedge to USD Index (the “Underlying Index”), which has been developed by MSCI Inc. (the “Index Provider” or “MSCI”) as an equity benchmark for stocks traded primarily on the Tokyo Stock Exchange with the foreign currency exposure of the securities included in the Underlying Index dynamically hedged against the U.S. dollar determined systematically by four currency risk indicators: carry, momentum, value, and volatility. The Underlying Index may include large-, mid- or small-capitalization companies.

Components primarily include consumer discretionary, financials and industrials companies. The components of the Underlying Index, and the degree to which these components represent certain industries, are likely to change over time.

As of its inception date, the Fund intends to seek to achieve its investment objective by investing a substantial portion of its assets in the Underlying Fund.

BFA uses a “passive” or indexing approach to try to achieve the Fund’s investment objective. Unlike many investment companies, the Fund does not try to “beat” the index it tracks and does not seek temporary defensive positions when markets decline or appear overvalued.

Indexing may eliminate the chance that the Fund will substantially outperform the Underlying Index but also may reduce some of the risks of active management, such as poor security selection. Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies.

BFA uses a representative sampling indexing strategy to manage the Fund and the Underlying Fund. “Representative sampling” is an indexing strategy that involves investing in a representative sample of securities or other instruments comprising the Underlying Index. The securities selected are expected to have, in the aggregate, investment characteristics (based on factors such as market capitalization and industry weightings), fundamental characteristics (such as return variability and yield) and liquidity measures similar to those of the Underlying Index. The Fund and the Underlying Fund may or may not hold all of the securities and other components of its Underlying Index. The Fund generally will invest at least 90% of its assets in the component securities (including indirect investments through the Underlying Fund) and other instruments of the Underlying Index and in investments that have economic characteristics that are substantially identical to the component securities of the Underlying Index (i.e., depositary receipts representing securities of the Underlying Index) and may invest up to 10% of its assets in certain futures, options and swap contracts, cash and cash equivalents, including shares of money market funds advised by BFA or its affiliates, as well as in securities not included in the Underlying Index, but which BFA believes will help the Fund track the Underlying Index. Components of the Underlying Index include equity securities and foreign currency forward contracts (both deliverable and non-deliverable) designed to hedge against non-U.S. currency fluctuations. The Fund seeks to track the investment results of the Underlying Index before the fees and expenses of the Fund.

In order to replicate the “hedging” component of the Underlying Index, which attempts to mitigate currency risk, the Fund intends to enter into foreign currency forward contracts designed to offset the Fund’s holdings in component securities denominated in a non-U.S. dollar currency. A foreign currency forward contract is a contract between two parties to buy or sell a specified amount of a specific currency in the future at an agreed upon exchange rate. The Fund’s exposure to foreign currency forward contracts is based on the exposure of the Fund to the component securities and a hedge ratio (“Hedge Ratio”), as calculated by MSCI.

The Underlying Index applies a methodology, based on the Hedge Ratio, that sells the total value or a portion of the total value of each non-U.S. dollar currency in which the securities of the Underlying Index are denominated in the form of a one-month currency contract to create a “hedge” against fluctuations in the relative value of the currencies in relation to the U.S. dollar. The Hedge Ratio is based on four commonly used indicators for measuring currency risk, which are equally weighted

and include: value (relative purchasing power between the foreign currency and the U.S. dollar based on exchange rates over a long-term average), momentum (relative price momentum of the foreign currency compared against the U.S. dollar over the previous six months), carry (differences in short-term interest rates between the foreign currency and the U.S. dollar over a long-term average), and volatility (relative price volatility of the foreign currency based on the currency's one-month average against its six-month average). The overall effect, since the four indicators are equally weighted, is that each foreign currency represented by constituent weights in the Underlying Index can be unhedged, 25% hedged, 50% hedged, 75% hedged or fully hedged relative to the U.S. dollar. The hedge (based on the Hedge Ratio) is reset on a monthly basis by MSCI and will not be adjusted intra-month based on movement in the value of the underlying equity securities and/or currencies, or based on the four indicators. The Underlying Index may therefore be slightly "over-hedged" (if equity values decline) or "under-hedged" (if the equity values increase) between the month-end rebalances. The Underlying Index is therefore intended to have higher returns than an equivalent unhedged investment when the component currencies are weakening relative to the U.S. dollar. Conversely, the Underlying Index is therefore intended to have lower returns than an equivalent unhedged investment when the component currencies are strengthening relative to the U.S. dollar. While the use of foreign currency forward contracts, based on the Hedge Ratio, is designed to minimize the impact of the strengthening or weakening of a foreign currency on Fund returns, it does not necessarily eliminate the Fund's exposure to the component currencies. The return of the foreign currency forward contracts may not perfectly offset the actual fluctuations between the component currencies and the U.S. dollar.

The Fund may use non-deliverable forward ("NDF") contracts to execute its hedging transactions. An NDF is a contract where there is no physical settlement of two currencies at maturity. Rather, based on the strengthening or weakening of the currencies, a net cash settlement will be made by one party to the other.

The Fund may lend securities representing up to one-third of the value of the Fund's total assets (including the value of any collateral received).

The Underlying Index is calculated by the Index Provider, which is independent of the Fund and BFA. The Index Provider determines the composition and relative weightings of the securities and currency forwards in the Underlying Index and publishes information regarding the market value of the Underlying Index.

The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that the Underlying Index is concentrated. For purposes of this limitation, securities of the U.S. government (including its agencies and instrumentalities) and repurchase agreements collateralized by U.S. government securities are not considered to be issued by members of any industry.

iShares Adaptive Currency Hedged MSCI Eurozone ETF

The iShares Adaptive Currency Hedged MSCI Eurozone ETF (DEZU) seeks to track the investment results of an index composed of large- and mid-capitalization equities from developed market countries which use the euro as their official currency while dynamically hedging currency risk for a U.S. dollar based investor.

The Fund seeks to track the investment results of the MSCI EMU Adaptive Hedge to USD Index (the “Underlying Index”), which has been developed by MSCI Inc. (the “Index Provider” or “MSCI”) as an equity benchmark for the European Monetary Union (the “EMU”) countries with the foreign currency exposure of the securities included in the Underlying Index dynamically hedged against the U.S. dollar determined systematically by four currency risk indicators: carry, momentum, value, and volatility. As of December 11, 2015, the Underlying Index consisted of securities from the following countries: Austria, Belgium, Finland, France, Germany, Ireland, Italy, the Netherlands, Portugal and Spain. The Underlying Index may include large-, mid- or small-capitalization companies. Components primarily include consumer discretionary, financials and industrials companies. The components of the Underlying Index, and the degree to which these components represent certain industries, are likely to change over time.

As of its inception date, the Fund intends to seek to achieve its investment objective by investing a substantial portion of its assets in the Underlying Fund.

BFA uses a “passive” or indexing approach to try to achieve the Fund’s investment objective. Unlike many investment companies, the Fund does not try to “beat” the index it tracks and does not seek temporary defensive positions when markets decline or appear overvalued.

Indexing may eliminate the chance that the Fund will substantially outperform the Underlying Index but also may reduce some of the risks of active management, such as poor security selection. Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies.

BFA uses a representative sampling indexing strategy to manage the Fund and the Underlying Fund. “Representative sampling” is an indexing strategy that involves investing in a representative sample of securities or other instruments comprising the Underlying Index. The securities selected are expected to have, in the aggregate, investment characteristics (based on factors such as market capitalization and industry weightings), fundamental characteristics (such as return variability and yield) and liquidity measures similar to those of the Underlying Index. The Fund and the Underlying Fund may or may not hold all of the securities and other components of its Underlying Index. The Fund generally will invest at least 90% of its assets in the component securities (including indirect investments through the Underlying Fund) and other instruments of the Underlying Index and in investments that have economic characteristics that are substantially identical to the component securities of the Underlying Index (i.e., depositary receipts representing securities of the Underlying Index) and may invest up to 10% of its assets in certain futures, options and swap contracts, cash and cash equivalents, including shares of money market funds advised by BFA or its affiliates, as well as in securities not included in the Underlying Index, but which BFA believes will help the Fund track the Underlying Index. Components of the Underlying Index include equity securities and foreign currency forward contracts (both deliverable and non-deliverable) designed to hedge against non-U.S. currency fluctuations. The Fund seeks to track the investment results of the Underlying Index before the fees and expenses of the Fund.

In order to replicate the “hedging” component of the Underlying Index, which attempts to mitigate currency risk, the Fund intends to enter into foreign currency forward contracts designed to offset the Fund’s holdings in component securities denominated in a non-U.S. dollar currency. A foreign currency forward contract is a contract between two parties to buy or sell a specified amount of a specific currency in the future at an agreed upon exchange rate. The Fund’s exposure to foreign

currency forward contracts is based on the exposure of the Fund to the component securities and a hedge ratio ("Hedge Ratio"), as calculated by MSCI.

The Underlying Index applies a methodology, based on the Hedge Ratio, that sells the total value or a portion of the total value of each non-U.S. dollar currency in which the securities of the Underlying Index are denominated in the form of a one-month currency contract to create a "hedge" against fluctuations in the relative value of the currencies in relation to the U.S. dollar. The Hedge Ratio is based on four commonly used indicators for measuring currency risk, which are equally weighted and include: value (relative purchasing power between the foreign currency and the U.S. dollar based on exchange rates over a long-term average), momentum (relative price momentum of the foreign currency compared against the U.S. dollar over the previous six months), carry (differences in short-term interest rates between the foreign currency and the U.S. dollar over a long-term average), and volatility (relative price volatility of the foreign currency based on the currency's one-month average against its six-month average). The overall effect, since the four indicators are equally weighted, is that each foreign currency represented by constituent weights in the Underlying Index can be unhedged, 25% hedged, 50% hedged, 75% hedged or fully hedged relative to the U.S. dollar. The hedge (based on the Hedge Ratio) is reset on a monthly basis by MSCI and will not be adjusted intra-month based on movement in the value of the underlying equity securities and/or currencies, or based on the four indicators. The Underlying Index may therefore be slightly "over-hedged" (if equity values decline) or "under-hedged" (if the equity values increase) between the month-end rebalances. The Underlying Index is therefore intended to have higher returns than an equivalent unhedged investment when the component currencies are weakening relative to the U.S. dollar. Conversely, the Underlying Index is therefore intended to have lower returns than an equivalent unhedged investment when the component currencies are strengthening relative to the U.S. dollar. While the use of foreign currency forward contracts, based on the Hedge Ratio, is designed to minimize the impact of the strengthening or weakening of a foreign currency on Fund returns, it does not necessarily eliminate the Fund's exposure to the component currencies. The return of the foreign currency forward contracts may not perfectly offset the actual fluctuations between the component currencies and the U.S. dollar.

The Fund may use non-deliverable forward ("NDF") contracts to execute its hedging transactions. An NDF is a contract where there is no physical settlement of two currencies at maturity. Rather, based on the strengthening or weakening of the currencies, a net cash settlement will be made by one party to the other.

The Fund may lend securities representing up to one-third of the value of the Fund's total assets (including the value of any collateral received).

The Underlying Index is calculated by the Index Provider, which is independent of the Fund and BFA. The Index Provider determines the composition and relative weightings of the securities and currency forwards in the Underlying Index and publishes information regarding the market value of the Underlying Index.

The Fund will concentrate its investments (i.e., hold 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that the Underlying Index is concentrated. For purposes of this limitation, securities of the U.S. government (including its agencies and instrumentalities) and repurchase agreements collateralized by U.S. government securities are not considered to be issued by members of any industry.

For more information regarding each Fund's investment strategy, please read the prospectus for the Funds.

As described more fully in the Trust's prospectus and Statement of Additional Information ("SAI"), the Funds issue and redeem Shares at net asset value ("NAV") only in large blocks of 50,000 Shares (each block of Shares called a "Creation Unit"). As a practical matter, only broker-dealers or large institutional investors with creation and redemption agreements (called Authorized Participants) can purchase or redeem these Creation Units. Except when aggregated in Creation Units, the Shares may not be redeemed with the Funds.

Shares are held in book-entry form, which means that no Share certificates are issued. The Depository Trust Company or its nominee is the record owner of all outstanding Shares of the Funds and is recognized as the owner of all Shares for all purposes.

The NAV per Share for each Fund is computed by dividing the value of the net assets of the Fund (i.e., the value of its total assets less total liabilities) by the total number of Shares outstanding. Expenses and fees are accrued daily and taken into account for purposes of determining NAV. The NAV of each Fund is determined each business day after the close of trading (ordinarily 4:00 p.m., Eastern Time or "ET") of the New York Stock Exchange. Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

The registration statement for the Funds describes the various fees and expenses for the Funds' Shares. For a more complete description of the Funds and the underlying indexes, visit the Funds' website at www.ishares.com.

PURCHASES AND REDEMPTIONS IN CREATION UNIT SIZE

NASDAQ members, BX members and PHLX members and member organizations are hereby informed that procedures for purchases and redemptions of Shares in Creation Unit Size are described in the Trust's prospectus and Statement of Additional Information and that Shares are not individually redeemable but are redeemable only in Creation Unit Size aggregations or multiples thereof.

PRINCIPAL RISKS

Interested persons are referred to the discussion in the prospectus for the Funds of the principal risks of an investment in the Funds. These include tracking error risk (factors causing a Fund's performance to not match the performance of its underlying index), market trading risk (for example, trading halts, trading above or below net asset value), investment style risk, sector risk, investment approach risk, non-diversification risk, issuer-specific risk, management risk, equity securities risk, currency hedging risk, derivatives risk and foreign securities risk.

EXCHANGE RULES APPLICABLE TO TRADING IN THE SHARES

Trading in the Shares on NASDAQ is on a UTP basis and is subject to NASDAQ equity trading rules. Trading of the Shares on BX is on a UTP basis and is subject to BX equity trading rules. Trading of the Shares on PHLX's PSX system is on a UTP basis and is subject to PHLX rules.

TRADING HOURS

The values of each index underlying the Shares are disseminated to data vendors every 15 seconds. The Shares will trade on NASDAQ between 7:00 a.m. and 8:00 p.m. ET. The Shares will trade on BX between 8:00 a.m. and 7:00 p.m. ET. The Shares will trade on PSX between 9:00 a.m. and 5:00 p.m. ET. For trading during each market's pre-market and post-market sessions, market participants should note that additional risks may exist with respect to trading the Funds during these sessions, when the underlying index's values, intraday indicative value, or similar value may not be disseminated or calculated.

DISSEMINATION OF FUND DATA

The Consolidated Tape Association will disseminate real time trade and quote information for the Funds to Tape B.

Fund Name	Listing Market	Trading Symbol	IOPV Symbol	NAV Symbol
iShares Adaptive Currency Hedged MSCI EAFE ETF	BATS	DEFA	DEFA.IV	DEFA.NV
iShares Adaptive Currency Hedged MSCI Japan ETF	BATS	DEWJ	DEWJ.IV	DEWJ.NV
iShares Adaptive Currency Hedged MSCI Eurozone ETF	BATS	DEZU	DEZU.IV	DEZU.NV

SUITABILITY

Trading in the Shares on NASDAQ will be subject to the provisions of NASDAQ Rule 2310. Trading in the Shares on BX will be subject to the provisions of BX Equity Rule 2310. Shares trading on PSX will be subject to the provisions of PHLX Rule 763. Members and member organizations recommending transactions in the Shares to customers should make a determination that the recommendation is suitable for the customer. In addition, members must possess sufficient information to satisfy the "know your customer" obligation that is embedded in both the NASDAQ Conduct Rules and the BX Conduct Rules.

NASDAQ members, BX members and PHLX members and member organizations should also review NASD Notice to Members 03-71 for guidance on trading these products. The Notice reminds members of their obligations to: (1) conduct adequate due diligence to understand the features of the product; (2) perform a reasonable-basis suitability analysis; (3) perform customer-specific suitability analysis in connection with any recommended transactions; (4) provide a balanced

disclosure of both the risks and rewards associated with the particular product, especially when selling to retail investors; (5) implement appropriate internal controls; and (6) train registered persons regarding the features, risk and suitability of these products.

TRADING HALTS

NASDAQ will halt trading in the Shares of a Fund in accordance with NASDAQ Rule 4120. BX will halt trading in the Shares of a Fund in accordance with BX Equity Rule 4120. PHLX will halt trading in the Shares of a Fund in accordance with PHLX Rule 3100. The grounds for a halt under these rules include a halt by the primary market because the intraday indicative value of the Fund, the value of its underlying index, or a similar value are not being disseminated as required, or a halt for other regulatory reasons. In addition, NASDAQ, BX and PHLX will also stop trading the Shares of a Fund if the primary market delists the Fund.

DELIVERY OF A PROSPECTUS

NASDAQ members, BX members and PHLX members and member organizations should be mindful of applicable prospectus delivery requirements under the federal securities laws with respect to transactions in the Funds.

Prospectuses may be obtained through the Funds' website. The prospectus for the Funds does not contain all of the information set forth in the Funds' registration statement (including the exhibits to the registration statement), parts of which have been omitted in accordance with the rules and regulations of the Securities and Exchange Commission ("SEC"). For further information about the Funds, please refer to the registration statement.

In the event that the Funds rely upon an order by the SEC exempting the Shares from certain prospectus delivery requirements under Section 24(d) of the 1940 Act and in the future make available a written product description, NASDAQ Rules 5705 and 5740, BX Equity Rules 4420 and 4421, and PHLX Rule 803 require that members and member organizations, respectively, provide to all purchasers of Shares a written description of the terms and characteristics of such securities, in a form prepared by the Trust for the Funds, no later than the time a confirmation of the first transaction in the Shares is delivered to such purchaser. In addition, members and member organizations shall include such a written description with any sales material relating to the Shares that is provided to customers or the public. Any other written materials provided by members or member organizations to customers or the public making specific reference to the Shares as an investment vehicle must include a statement in substantially the following form: "A circular describing the terms and characteristics of the Shares of the Fund has been prepared by the Trust and is available from your broker. It is recommended that you obtain and review such circular before purchasing Shares of the Fund. In addition, upon request you may obtain from your broker a prospectus for Shares of the Fund."

Any NASDAQ, BX or PHLX member or member organization carrying an omnibus account for a non-member broker-dealer is required to inform such non-member that execution of an order to purchase Shares for such omnibus account will be deemed to constitute agreement by the non-member to make such written description available to its customers on the same terms as are directly applicable to NASDAQ members, BX members and PHLX members or member organizations under this rule.

Upon request of a customer, NASDAQ members, BX members and PHLX members or member organizations shall provide a copy of the prospectus.

EXEMPTIVE, INTERPRETIVE AND NO-ACTION RELIEF UNDER FEDERAL SECURITIES REGULATIONS

The SEC has issued exemptive, interpretive or no-action relief from certain provisions of rules under the Securities Exchange Act of 1934 (the "Act") regarding trading in the above mentioned exchange-traded Funds.

REGULATION M EXEMPTIONS

Generally, Rules 101 and 102 of Regulation M prohibit any "distribution participant" and its "affiliated purchasers" from bidding for, purchasing, or attempting to induce any person to bid for or purchase any security which is the subject of a distribution until after the applicable restricted period, except as specifically permitted in Regulation M. The provisions of the Rules apply to underwriters, prospective underwriters, brokers, dealers, and other persons who have agreed to participate or are participating in a distribution of securities.

The SEC has granted an exemption from Rule 101 under Regulation M to permit persons participating in a distribution of shares of the above-mentioned Funds to engage in secondary market transactions in such shares during their participation in such a distribution. In addition, the SEC has granted relief under Regulation M to permit persons who may be deemed to be participating in the distribution of Shares of the above-mentioned Funds (i) to purchase securities for the purpose of purchasing Creation Unit Aggregations of Fund Shares and (ii) to tender securities for redemption in Creation Unit Aggregations. Further, the SEC has clarified that the tender of Fund Shares to the Funds for redemption does not constitute a bid for or purchase of any of the Funds' securities during the restricted period of Rule 101. The SEC has also granted an exemption pursuant to paragraph (e) of Rule 102 under Regulation M to allow the redemption of Fund Shares in Creation Unit Aggregations during the continuous offering of Shares.

CUSTOMER CONFIRMATIONS FOR CREATION OR REDEMPTION OF FUND SHARES (SEC RULE 10B-10)

Broker-dealers who handle purchases or redemptions of Fund Shares in Creation Unit size for customers will be permitted to provide such customers with a statement of the number of Creation Unit Aggregations created or redeemed without providing a statement of the identity, number and price of shares of the individual securities tendered to a Fund for purposes of purchasing Creation Unit Aggregations ("Deposit Securities") or the identity, number and price of shares to be delivered by the Trust for the Fund to the redeeming holder ("Redemption Securities"). The composition of the securities required to be tendered to the Fund for creation purposes and of the securities to be delivered on redemption will be disseminated each business day and will be applicable to requests for creations or redemption, as the case may be, on that day. This exemptive relief under Rule 10b-10 with respect to creations and redemptions is subject to the following conditions:

- 1) Confirmations to customers engaging in creations or redemptions must state that all information required by Rule 10b-10 will be provided upon request;

- 2) Any such request by a customer for information required by Rule 10b-10 will be filed in a timely manner, in accordance with Rule 10b-10(c);
- 3) Except for the identity, number and price of shares of the component securities of the Deposit Securities and Redemption Securities, as described above, confirmations to customers must disclose all other information required by Rule 10b-10(a).

SEC RULE 14E-5

An exemption from Rule 14e-5 has been granted to permit any person acting as a dealer-manager of a tender offer for a component security of a Fund (1) to redeem Fund Shares in Creation Unit Aggregations from the issuer that may include a security subject to such tender offer and (2) to purchase Fund Shares during such tender offer. In addition, a no-action position has been taken under Rule 14e-5 if a broker-dealer acting as a dealer-manager of a tender offer for a security of a Fund purchases or arranges to purchase such securities in the secondary market for the purpose of tendering such securities to purchase one or more Creation Unit Aggregations of Shares, if made in conformance with the following:

- 1) such bids or purchases are effected in the ordinary course of business, in connection with a basket of 20 or more securities in which any security that is the subject of a distribution, or any reference security, does not comprise more than 5% of the value of the basket purchased; or
- 2) purchases are effected as adjustments to such basket in the ordinary course of business as a result of a change in the composition of the underlying index; and
- 3) such bids or purchases are not effected for the purpose of facilitating such tender offer.

Section 11(d)(1); SEC Rules 11d1-1 and 11d1-2

Section 11(d)(1) of the Act generally prohibits a person who is both a broker and a dealer from effecting any transaction in which the broker-dealer extends credit to a customer on any security which was part of a new issue in the distribution of which he participated as a member of a selling syndicate or group within thirty days prior to such transaction. The SEC has clarified that Section 11(d)(1) does not apply to broker-dealers that are not Authorized Participants (and, therefore, do not create Creation Unit Aggregations) that engage in both proprietary and customer transactions in Shares of the Fund in the secondary market, and for broker-dealer Authorized Participants that engage in creations of Creation Unit Aggregations. This relief is subject to specific conditions, including the condition that such broker-dealer (whether or not an Authorized Participant) does not, directly or indirectly, receive from the fund complex any payment, compensation or other economic incentive to promote or sell the Shares of a Fund to persons outside the fund complex, other than non-cash compensation permitted under NASD Rule 2830(l)(5)(A), (B) or (C). (See [letter](#) from Catherine McGuire, Chief Counsel, SEC Division of Market Regulation, to Securities Industry Association, Derivative Products Committee, dated November 21, 2005.) The SEC also has taken a no-action position under Section 11(d)(1) of the Act that broker-dealers may treat Shares of a Fund, for purposes of Rule 11d1-2, as "securities issued by a registered open-end investment company as defined in the Investment Company Act" and thereby extend credit or maintain or arrange for the extension or maintenance of credit on Shares that have been owned by the persons to whom credit is provided for more than 30 days, in reliance on the exemption contained in the rule.

SEC RULE 15C1-5 AND 15C1-6

The SEC has taken a no-action position with respect to Rule 15c1-5 and Rule 15c1-6 as to the required disclosure of control by a broker or dealer with respect to creations and redemptions of Fund Shares and secondary market transactions therein. (See [letter](#) from Catherine McGuire, Chief Counsel, SEC Division of Market Regulation, to Securities Industry Association, Derivative Products Committee, dated November 21, 2005.)
